

## Week 7/ Riddles

1. I am a number. If you multiply the number of minutes in a day by the number of hours in a week, you will find half my value. I am \_\_\_\_\_.

2. I am a fraction. They say I am not proper. I may be improper, but I know I'm worth exactly as much as the number seven. My numerator (top) is 21. What fraction am I?

3. I am a time of the day. I'm in North Carolina when it's noon in Nevada. I am \_\_\_\_\_. (Think time zones for help)

4. I am a day of the week. I come right after and right before days that have the same number of letters in their names (English spelling) as each other. What day am I?

5. I am a six digit number. To write me correctly, you must use five zeros. You do not need a decimal point to write me correctly. One of my digits is a two. The zeros are not first. What number am I?

6. I am a number. I am the product of the number of digits in half a million and the number of years in a decade. What number am I?
